AP	Anatomic Pathology	Elective Choices:	Cytopathology
CP	Clinical Pathology		Dermatopathology
			GI Pathology
Site 1	Geisinger Medical Center		Renal Pathology
Site 2	Quest Diagnostics		Forensic Pathology
Site 3	Neogenomics		Research
Site 4	Forensic Pathology Associates		Transfusion Medicine
			Microbiology
			Molecular Pathology
			Informatics

- Notes:
1. Residents have four weeks of vacation per year, which can be taken in blocks of one or more weeks. Vacation will be planned with the program director at least three months in advance, so that schedules can be adjusted if necessary.
 2. All rotations with the exceptions of cytogenetics, forensics and potentially an elective are located at Site 1 (Geisinger Medical Center). Cytogenetics at Site 2 (Quest Diagnostic) or Site 4 (Neogenomics) and forensics is located at Site 3 (Forensic Pathology Associates).
 3. Research projects will run concurrently with the various rotations. Also, there is the option of taking a research elective month.
