

## Patient Scrubs™, a Pre-Surgical Medical Disposable Garment

### *Application*

- ◆ *Disposable modesty garment*

### *Advantages*

- ◆ *Easily removable during surgery*
- ◆ *Disposable*
- ◆ *Provides comfort for the patient*

### *Introduction*

Patient Scrubs™ is a pre-surgical medical modesty disposable garment designed to be easily removable, disposable and comfortable to the patient. The garment has been carefully designed by medical and clothing designer experts to be:

1. easily removable
2. disposable
3. safe
4. comfortable
5. non see-through
6. radio translucent for medical imaging

Patient Scrubs™ are modeled after existing surgical scrubs but intended for patient use. Patients also feel comfortable as they are wearing similar scrubs as surgeons and nursing staff, contributing to a sense of inclusion. The design is constructed to be wearable under a gown and have features able to be used during surgery. A deep V-neck would prevent tearing with garment placement and allow easy EKG placement without female breast exposure. Shoulder perforations enable easy positioning of IV lines.

Patient Scrubs™ are ideally suited for outpatient surgery clinic, cosmetic clinics, and medi-spas.
