It's not too late to get your flu shot

Getting a flu shot early in the fall is best, but if it slipped your mind, don't worry. Getting one now can still protect you for the remainder of the flu season. Flu viruses change, so the annual vaccine is updated to protect against the virus strains that are expected to go around this year.

Because of the pandemic, getting a flu shot is especially smart this year. Vaccination against the flu helps in two ways. First, if it keeps you from being hospitalized with the flu, that puts less strain on your local healthcare system. Second, it can prevent a disease with symptoms that are very similar to those of COVID-19.

Adults should get a seasonal flu vaccine every year — especially if you're an older adult, have chronic health conditions or are pregnant.

Make sure children 6 months and older are protected by the flu vaccine, too. A flu shot can help keep very young kids and those with chronic conditions (like asthma, diabetes or disorders of the brain or nervous system) out of the hospital.

Contact your doctor today to schedule your flu shot. Then you can breathe easy for the rest of flu season.

Prescriptions at your doorstep

Who wouldn't like one less errand to run? With Geisinger Mail Order Pharmacy, you get a 3-month supply (up to 100 days of medications) mailed directly to you.

To get started, call Geisinger Mail Order Pharmacy at 844-878-5562, between 6:30 a.m. and 7 p.m., Monday through Friday, or visit [geisinger.org/pharmacy](https://www.geisinger.org/pharmacy).

**This benefit includes maintenance medications, like diabetes, blood pressure or cholesterol medications, but does not include all medications. Benefits and costs will vary, depending on your specific coverage, or if you're enrolled in a cost assistance program. Contact the Customer Care Team with any questions.*

Join our webinars and challenges

Stay engaged in your health and well-being through a variety of monthly options. These programs will help you build healthy habits and keep you motivated to reach your personal health goals.

To get more information and sign up for a webinar or challenge, visit go.geisinger.org/WellnessCalendar. If you need help registering or have any questions, call 866-415-7138 or email wellness@geisinger.edu.

January

Coffee & Convo–Men's Health: Up Your Game

Jan. 6, 2021, 10–10:30 a.m.

New Year, New Me webinar

Jan. 13, 2021, noon and 2 p.m.

Learn how to transform your New Year's resolution into a lasting lifestyle change.

Women's health and wellness

Jan. 20, 2021, 10–10:30 a.m.

February

Week of Wellness challenge

Feb. 1–Feb. 28, 2021

Register and follow the schedule of daily tasks to get on track to a healthier you.

Coffee & Convo–Heart Disease: All For the Health of It

Feb. 3, 2021, 10–10:30 a.m.

Stress Less webinar

Feb. 17, 2021, noon and 2 p.m.

Learn stress management techniques to help you keep a balance in mind and body.

Dental Health: The T(r)ooth Hurts

Feb. 17, 2021, 10–10:30 a.m.

March

March Mayhem challenge

Mar. 1–Mar. 28, 2021

Increase your physical activity and improve other aspects of your health. Participate individually or as a team to compete for bragging rights and prizes.

Coffee & Convo– Colorectal Cancer: Prevention is Key

Mar. 3, 2021, 10–10:30 a.m.

Migraine Awareness

Mar. 17, 2021, 10–10:30 a.m.

Building Healthy Relationships with Food and Body webinar

Mar. 17, 2021, noon and 2 p.m.

Learn why you should ditch dieting, improve your relationship with food and embrace your body at every size.

Keeping your bones healthy

Osteoporosis, when bones become weak and break more easily, happens when your body doesn't create new bone as fast as it removes old bone. Luckily, an easy test will tell you your bone density — and then, with a few simple lifestyle changes, you can keep your bones strong.

Factors that put you at higher risk for osteoporosis:

- Low calcium and vitamin D intake
- Breaking a bone after age 50
- Being post-menopausal (women of any age)
- Weighing less than 127 pounds
- Sedentary lifestyle
- Smoking
- Excessive drinking
- Being 50 or older
- Taking medication that causes bone loss

You should also ask your doctor about osteoporosis if you have:

- Height loss of ½ inch or more within 1 year or total height loss of 1½ inches from original height
- Developed a hunched posture or a sudden back pain with no cause

Healthy bone density

Keep your bones strong

- Make sure you get enough calcium and vitamin D every day. Split your calcium intake into 3 servings throughout the day.
- Do weight-bearing, endurance and muscle-strengthening exercises (e.g., brisk walking, aerobics class, tennis, dancing) for at least 2½ hours each week.
- Stop smoking.
- Consume less than 2 alcoholic drinks per day. Talk to your healthcare provider about your risk for osteoporosis.

Osteoporosis

New home medical equipment and supplies program

Beginning January 1, 2021, Geisinger Health Plan (GHP) will be working with Tomorrow Health to streamline the ordering and delivery of your home medical equipment and supplies. Tomorrow Health is a comprehensive platform that will match your order to the most appropriate supplier in GHP's network.

To ensure you receive the best care experience, Tomorrow Health offers:

- Premium service: Tomorrow Health's dedicated team of care advocates are available by phone and email and can assist with everything from product selection to prescription and insurance coordination.
- Reliable delivery and product support: Tomorrow Health will support you from order placement and delivery through in-home setup. We'll also close the loop with your provider, so that you stay on track with your care plan.
- Easy ordering: Health care providers and members can place orders for home medical equipment and supplies securely online or by phone.

Existing orders

If you currently receive a recurring home medical supply order or equipment rental, there is nothing you need to do at this time. Tomorrow Health will reach out to you directly in 2021 should your orders be impacted.

New orders

Visit home.TomorrowHealth.com/ghp or call 844-402-4344, and Tomorrow Health's care advocate team can help you navigate your needs. Your provider may also place new orders directly through the Tomorrow Health platform.

Tomorrow Health was founded on the belief that patients deserve an exceptional experience for care at home. With that, they've brought together personal service and modern technology to get you the products and supplies you need, covered by your insurance, delivered and set up in your home. Tomorrow Health is looking forward to serving you.

Keep working out this winter

Most people find it easier to work out during the warmer weather. But don't let winter wreck your workout routine. Sure, it's cold outside and gets dark early, but if you can stay motivated and keep working out, you'll stay healthier, keep your weight down and beat those winter blues!

The first step? Avoid hibernating indoors. We need sunshine for vitamin D to boost our mood and fresh air to feel energized. Before heading out, do some jumping jacks or jogging in place for 5 to 10 minutes to warm your muscles up so you won't feel as cold when you go out. Wear layers so you can peel off clothes if you get too warm. Then do some shoveling, go sled-riding or ice skating, or just take a brisk walk around the neighborhood.

If getting outside isn't your thing, try some at-home workouts. Lift weights, hop on a treadmill or stationary bike, follow along with an exercise video or play some tunes and dance around your living room. Mix it up — you don't have to do the same thing every day. The trick is to get your body moving, however you want to do it.
