- Provider credentialing process
- Summary of provider reimbursement methodologies
- Procedures for covering experimental drugs/procedures
- Summary of quality assurance program
- Provider List and/or monthly Provider List Updates
- Pharmacy formulary
- Provider privileges at contracted hospitals

### Important information, definitions, and limitations

**Case Management:** a service where Plan nurses assist members with serious conditions to obtain appropriate support and services so that members can achieve their optimal level of health.

**Concurrent review:** a process to ensure that medically necessary, appropriate care is delivered to a hospitalized member.

**Confidentiality:** the Plan’s confidentiality policy protects members’ privacy of their personal health information including medical records, claims, benefits and other administrative data in all settings. The policy also prohibits sharing personal health information with employers including fully insured employers. However, as a member you always have access to your medical records. Upon enrollment, members sign routine consent forms which allow the Plan to use your information to conduct its business like paying claims and for measurement of data where members identifiers are removed to assure confidentiality. For release of any other personal information, except when required by law, you will be asked to sign a special consent form. A complete copy of the confidentiality policy is available by contacting the Customer Care Team.

**Continuity of care for new members (Act 68):** Under the provisions of Act 68, a new member can continue on-going treatment with a non-participating physician for the first 60 days of enrollment. If a member is in her second or third trimester of pregnancy, services will be covered through delivery and postpartum. To initiate this request, the member must contact the Customer Care Team prior to receiving treatment. The Plan will confer with the provider to determine if the provider will accept the Plan’s terms and conditions for payment. If the provider does not agree, the services of the non-participating provider will not be covered.

**Covered services:** Covered services that are not available within the Plan’s network or are out of the Plan’s service area must be authorized in advance by the Plan.

June 2021
Medical Necessity or Medically Necessary: covered services rendered by a health care provider that the Plan determines are: a) appropriate for the symptoms and diagnosis or treatment of the member's condition, illness, disease or injury; b) provided for the diagnosis, or the direct care and treatment of the member's condition, illness, disease or injury; c) in accordance with current standards of medical practice; d) not primarily for the convenience of the member, or the member's provider; and e) the most appropriate source or level or service that can safely be provided to the member. When applied to hospitalization, this further means that the member requires acute care as an inpatient due to the nature of the services rendered or the member's condition, and the member cannot receive safe or adequate care as an outpatient.

Prior authorization: the process by which approval is given by the Plan for covered services based on medical necessity, eligibility and benefit availability at the time the covered services are to be provided prior to the services being performed.

PCP: primary care physician.

Retrospective review: to determine the appropriateness of treatment, the Plan will complete a post-clinical review when necessary to determine whether or not the treatment met coverage guidelines. Based on this review, claims associated with treatment will be approved or denied.

This document is intended as an easy-to-read summary. Benefits, limitations and exclusions are provided in accordance with the Subscription Certificate and applicable riders under which a member is enrolled. This managed care plan may not cover all your health care expenses. Read your Subscription Certificate and riders carefully to determine which health care services are covered.
