Northern Light Employee Plan

Geisinger

List of covered drugs

General Formulary Information

This formulary is applicable to the Northern Light Employee Prescription Medication Benefit plans offered by Geisinger Health Plan, Geisinger Choice PPO and Geisinger Health Options.

We encourage you to contact our Pharmacy Customer Service Team if you have any questions about this information or the type of benefit in which you are enrolled. Also, please refer to your benefit documents, as formulary exclusions may differ based on the specific benefit.

This formulary represents the Northern Light Employee Prescription Medication benefit. This formulary was designed to be a useful tool if you have prescription medication coverage. It lists the medications covered by your plan. Medications are listed in this formulary by medication category; individual medications can be looked up by using the index at the back.

Please note that you can also view the formulary online at www.geisinger.org/health-plan.

Northern Light Employee Benefit

The Northern Light Employee benefit assigns each prescription medication to one of three different tiers, each representing a set copay amount. The copay amount will depend on your prescription medication rider. Additional medications, other than those included in this formulary, may be covered under the Triple Choice benefit. The definitions of the copay levels are listed below:

- Tier 1 - Includes most generic medications and has the lowest copayment. Prior authorization is usually not necessary for medications in this tier.
- Tier 2 - Includes certain formulary brand name medications with no generic equivalent and select generic medications. Prior authorization may be necessary for medications in this tier.
- Tier 3 - Includes certain formulary brand name medications, brand name medications with a generic equivalent (unless higher cost-sharing applies), and specialty medications. Non-formulary brand name medications, if approved, will apply tier 3 cost sharing. Prior authorization may be necessary for medications in this tier.

The Plan maintains sole discretion of assigning medications to tiers and moving medications from one tier to another. Several factors are considered when assigning medications to tiers. These factors include but are not limited to:

- Availability of a generic equivalent
- Absolute cost of a medication
- Cost of the medication relative to other medications in the same therapeutic class
- Availability of over-the-counter alternatives
- Clinical and economic factors

Please note: A medication may change in tier status without notice due to immediate generic availability or changes in medication availability in the marketplace.

Specialty Vendor Medication Program

Certain medications require the use of a contracted specialty pharmacy vendor for purchase. Please contact the Pharmacy Service Team for additional information on the program and a complete list of the medications included. Note that a maximum of a 34-day supply may be dispensed for specialty vendor medications unless a shorter duration is specified in the formulary or in your specific benefit documents. Medications included in the Specialty Vendor Medication Program are designated in the formulary with SP in the Requirements/Limits column.

A few things you should remember when using this formulary and your prescription benefit:

- All prescriptions must be filled at a participating pharmacy.
- You will pay the applicable copay, coinsurance, or deductible when you receive the prescription.
- Except for those medications classified as being narrow therapeutic index, a brand name medication with a generic equivalent requires prior authorization. If approved, it will be covered at the highest applicable copay.
- Some medications on the formulary require prior authorization or step therapy which your provider may request through our Pharmacy Customer Service Team.
- If you require medications not listed on this formulary, your provider may request an exception through our Pharmacy Customer Service Team. Those items listed as specific exclusions are not available through the exceptions process. Non-formulary medications will be available at the tier 3 copay level, if approved.
- Some medications and diabetic supplies may be restricted to a specific manufacturer, vendor or supplier and may be subject to quantity limits.
- Quantity limits may apply to certain medications.
- Brand and generic Triptan medications for migraines have a quantity limit of 16 units per 28 days across all products and dosage forms (sumatriptan, rizatriptan, naratriptan, almotriptan, frovatriptan, eletriptan, zolmitriptan, and sumatriptan/naproxen).
- Insulin syringes and lancets are covered at Tier 2.
- Non-prescription (over-the-counter) medications are not covered unless required by health care reform legislation.
- Note that if certain conditions are met, some medications may be covered with no copay/coinsurance due to health care reform legislation. Please contact the Pharmacy Customer Service Team for more information.

- Many compounded prescriptions require prior authorization review, which your provider may request through our Pharmacy Customer Service Team. If an exception is approved, you will be charged at the Tier 1 copay level if the primary ingredient is generic or the Tier 3 copay level if the primary ingredient is brand. If your request is denied, the medication will be excluded from coverage under your prescription medication benefits.
- Medications listed on Tier 0 are covered at \$0 copay.
- All prescriptions for a total morphine equivalent dose (MED) of 50 or greater will require prior authorization. Short acting opioid prescriptions will require prior authorization for opioid naïve members if more than a 10-day supply is required for an adult or more than a 5-day supply for a member under 18 years of age.

Using this formulary

- Medications are listed by therapeutic class within the table of contents. An alphabetical index of all medications can be found at the back of the formulary.
- The medication Tier is listed in the Drug Tier Column.
- Medication names with AL in the Requirements/Limits column have age limits.
- Medication names with QL in the Requirements/Limits column have quantity limits.
- Medication names followed by PA in the Requirements/Limits column require prior authorization.
- Medication names followed by PA NSO in the Requirements/Limits column require prior authorization for new starts only.
- Medication names followed by ST in the Requirements/Limits column have step therapy requirements.
- Medication names followed by SP in the Requirements/Limits column must be obtained from a network specialty vendor.
- This formulary is accurate as of December 1, 2024 and is subject to change. Any additions or deletions to the formulary throughout the year may be found in the following publications: “Member Update” for members and “Healthcare Provider Update” for providers. The most up-to-date source for formulary information is the online formulary search available at www.geisinger.org/health-plan.
- **Restrictions in medication availability may result from use of a formulary.**

Certain prescription medications listed in this formulary may not be covered for everyone. Your prescription medication benefits are dependent upon the coverage selected by you or your employer. Please be aware that if you choose to obtain a non-formulary medication, you may be required to pay the full price of that medication. For information about your specific prescription medication benefits, please contact the Pharmacy Customer Service Team.

Quantity Limits

- Quantity limits are listed in the Requirements/Limits Column
- Note that non-formulary medications in the same class/category as formulary drugs with quantity limits will have the same quantity limits applied.
- If not listed above, the maximum day supply for specialty vendor medications is 34 days or as otherwise defined in the prescription medication benefit documents.

Step Therapy

For details regarding step therapy requirements please contact the Pharmacy Customer Service Team at (800) 988-4861 or (570) 271-5673.

What is a medication formulary?

A medication formulary is a continually updated list of prescription medications. It represents the medications currently covered based upon the clinical judgment of the Pharmacy and Therapeutics Committee, which is made up of pharmacists and physicians. (The formulary is continually updated due to the high number of medications currently on the market, as well as the continuous introduction of new medications.) This committee thoroughly reviews medical literature to first determine which medications are likely to produce the best results for patients. Then, if two or more medications produce the same clinical results, elements like cost and ease of use are considered. A well-developed formulary enhances quality of patient care by encouraging physicians to prescribe medications that are safe, effective, and likely to achieve the best possible outcome for the patient. When you use a formulary medication, it is considered a “covered” medication and you pay your particular co-pay or coinsurance for that medication.

The Plan recognizes that, in some situations, you may not respond well to a given formulary medication or may have an allergy or other condition that warrants the use of a non-formulary medication. An exception process exists for these special instances. Your physician may initiate a request for a formulary exception by contacting our Pharmacy Service Team. Your request will be reviewed, including review of pertinent medical records, treatment and laboratory data. We respond to such requests within 48 hours of receiving all necessary information. If an exception is approved under the Triple Choice benefit, you will be charged at the highest applicable copay level. If your request is denied, the medication will be excluded from coverage under your prescription medication benefits.

Formulary exclusions

There are certain medications that your plan will not cover under any circumstance. These are called exclusions.

Some examples of excluded medications include those that are:

- Available over-the-counter
- Used for experimental, investigational, or unproven therapies
- Used for weight loss and weight management
- Used for cosmetic purposes
- Used for sexual dysfunction

Other exclusions may apply and are subject to change so you should contact the Pharmacy Customer Service Team when you are unsure whether a medication is covered.

Health Care Reform

The Affordable Care Act (ACA) was signed into law on March 23, 2010. Under the ACA, the government created “provisions,” or laws, that health insurers must adapt to, which change health benefits for consumers. These changes include the expansion of preventive services, including vaccinations, prescription drugs, and more. In accordance with the ACA requirements, and subject to any applicable limitations of your pharmacy plan, the following preventive medications will be covered with no cost-sharing under the prescription drug benefit:

- Aspirin Products - Low dose (81 mg) aspirin products
 - As preventive medication after 12 weeks of gestation in women who are at high risk for preeclampsia.
- Contraceptives - For females
- Bowel Preparations for Colonoscopy - Brands with no generic and generic products
 - In preparation of a screening colonoscopy for members 45-75 years of age.
- Breast Cancer Prevention - Generic anastrozole, exemestane, letrozole, raloxifene and tamoxifen
 - For women who are at increased risk of breast cancer and at low risk for adverse medication effects, clinicians should offer to prescribe risk-reducing medications, such as anastrozole, exemestane, letrozole, raloxifene or tamoxifen.
- Folic Acid Supplements - Generic folic acid 0.4 mg and 0.8 mg tablets
 - All women who are planning or capable of pregnancy.
- Fluoride Supplements - Fluoride drops and chewable tablets
 - Oral fluoride supplementation starting at 6 months for children whose water supply is fluoride sufficient up to age 16 years for the prevention of dental caries.
- HIV Pre-Exposure Prophylaxis - Apretude 600 mg/3 mL injection, Descovy 200-25 mg tablet, emtricitabine/tenofovir 200-300 mg tablet, and Vocabria 30 mg tablet
- Smoking Cessation Products - Brands with no generic and generic products
 - Two, 90-day treatment courses per benefit year.
- Statin Preventive Medication - generic products
 - For adults aged 40 to 75 years who have 1 or more cardiovascular risk factors (i.e., dyslipidemia, diabetes, hypertension, or smoking) and an estimated 10-year risk of a cardiovascular event of 10% or greater.
- Vaccinations - Preventive vaccines are covered for \$0 cost sharing based on appropriate age and Food and Drug Administration (FDA) approved uses.

Please note: For details about how these medications may be covered under your specific plan please contact the Pharmacy Customer Service Team. A prescription is required to process any claim for preventive care medications or products under the pharmacy plan, including over-the-counter medications.

Formulary development

When deciding whether or not a medication should be included in the formulary, the Health Plan's Pharmacy and Therapeutics Committee carefully considers each medication for coverage or non-coverage in order to ensure safety and effectiveness in the medications being prescribed. This information is then shared with participating providers for review and feedback. Based upon the gathered information and provider feedback, the Pharmacy and Therapeutics Committee will determine a medication's inclusion or exclusion in the formulary. For the specific criteria used to determine a medication's inclusion or exclusion in this formulary, please contact the Pharmacy Customer Service Team.

What are generics?

When a company develops a new medication, it receives a patent that protects the medication company's right to be the only manufacturer of that medication for a certain period of time. This means that no generic can be manufactured during that time. After that patent expires, other companies can then make the same medication and sell it in its generic form. The generic form of a medication has the same active ingredients, the same strength, and the same dosage as the brand name medication. The inactive ingredients (which provide texture, shape and color) may be different, which is why a generic typically looks different than its brand name counterpart. Generic medications are usually less expensive than brand name medications, but are just as safe and effective. This is because generic manufacturers have lower advertising costs and greater competition from other generic manufacturers. Additionally, the U.S. Food and Drug Administration regulates all pharmaceuticals, including generics, to assure quality, strength, purity and potency.

Your prescription plan is based on coverage of generic medications. Whenever possible, you should use a cost-effective generic medication.

Notes for providers

Formulary review process: Medications selected for inclusion in the formulary are chosen in consideration of effectiveness, safety and overall value. Evaluation for formulary inclusion is based on formalized selection criteria to determine the most optimal benefit to members. These criteria include but are not limited to:

- Medication name/dosage form
- Medication class/pharmacology
- FDA-approved indications
- Adverse reactions
- Clinical evidence of safety and efficacy
- Recommendations of national agencies and organizations
- Therapeutic equivalence
- Cost analysis

The criteria are reviewed by the Health Plan Pharmacy and Therapeutics Committee, which is comprised of pharmacists and participating physicians in active clinical practice from various specialties. The medication is then reviewed and evaluated by clinicians in particular specialties for additional feedback. The feedback is discussed by the Pharmacy and Therapeutics Committee prior to finalizing a decision on formulary status. To be included, the medication must offer a distinct advantage over existing formulary medications in the same therapeutic class. Specifically, the medication must demonstrate such attributes as:

- A distinct or unique therapeutic feature
- Greater efficacy, proven in clinical trials, over other medications in the same therapeutic category
- An improved dosing schedule, safety profile or cost-effectiveness over existing formulary medications
- If there are comparable therapeutic agents, additional analysis may be considered. These factors include:
 - Member satisfaction
 - Cost analysis
 - Contract terms and conditions
 - Market share analysis
 - Patent life assessment
 - Utilization management
 - Consumer advertising
 - Per member per month costs

Generic substitution policy: The Health Plan prescription benefits are generically based. Generic substitution will occur for those medications included in the “Approved Medication Products with Therapeutic Equivalence Evaluations,” also known as “The Orange Book,” published by the U.S. Department of Health and Human Services. Generic medications, which have an equivalent rating by these standards, are generally provided under the member’s prescription medication benefit. The Health Plan may also elect to include only one brand-name medication in the formulary even if the medication is marketed by more than one company, or if the brand name medication does not significantly differ from the generic medication.

Prior authorization: To promote the most appropriate utilization, select medications may require prior authorization by the Health Plan to be eligible for coverage under the member's prescription benefit. The Pharmacy and Therapeutics Committee determines prior authorization criteria. In order for a member to receive coverage for a medication requiring prior authorization, the prescribing physician must obtain prior authorization by contacting the Health Plan Pharmacy Department. Submission of medical documentation is required. Prior authorization can be requested:

- Online at ghp.promptpa.com
- By faxing a completed prior authorization form to 570-300-2122
- By mailing a completed prior authorization form to:
 - Attention Pharmacy Department 24-10
100 North Academy Avenue
Danville, PA 17822
- Prior authorization for certain medications can be initiated via phone by calling 800-988-4861

Step Therapy: Some medications may require that other medications be tried prior to or concomitantly with the requested medication. The pharmacy claims system looks for a record of the required medications and if they are not found, medical documentation must be submitted showing use of these medications or rationale for skipping the step therapy medications.

Non-formulary medications: The formulary is designed to meet most therapeutic needs of the population served by the Health Plan. Occasionally, because of allergy, therapeutic failure, or a specific diagnostic-related need, formulary medications may not meet the special needs of an individual member. In these special instances, the prescribing physician may make requests to the Health Plan Pharmacy Department for non-formulary or restricted medications. The prescribing physician will receive written documentation and/or a verbal response from the Health Plan Pharmacy Department regarding the request.

Formulary addition requests: Requests for changes or additions, comments, and suggestions for the formulary are welcome and can be made by written request to the Health Plan Pharmacy Department.
