Policy: MP166
Section: Medical Benefit Policy
Subject: Magnetic Resonance (MR) Guided Ultrasound Ablation of Uterine Fibroids.

I. Policy: Magnetic Resonance (MR) Guided Ultrasound Ablation of Uterine Fibroids

II. Purpose/Objective:
To provide a policy of coverage regarding Magnetic Resonance (MR) Guided Ultrasound Ablation of Uterine Fibroids.

III. Responsibility:
A. Medical Directors
B. Medical Management Department

IV. Required Definitions
1. Attachment – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. Exhibit – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. Devised – the date the policy was implemented.
4. Revised – the date of every revision to the policy, including typographical and grammatical changes.
5. Reviewed – the date documenting the annual review if the policy has no revisions necessary.

V. Additional Definitions
Medical Necessity or Medically Necessary means Covered Services rendered by a Health Care Provider that the Plan determines are:

a. appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
b. provided for the diagnosis, and the direct care and treatment of the Member's condition, illness disease or injury;
c. in accordance with current standards of good medical treatment practiced by the general medical community;
d. not primarily for the convenience of the Member, or the Member's Health Care Provider; and
the most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

Medicaid Business Segment
Medical Necessity shall mean a service or benefit that is compensable under the Medical Assistance Program and if it meets any one of the following standards:
(i) the service or benefit will, or is reasonably expected to, prevent the onset of an illness, condition or disability.
(ii) the service or benefit will, or is reasonably expected to, reduce or ameliorate the physical, mental or development effects of an illness, condition, injury or disability.
(iii) the service or benefit will assist the Member to achieve or maintain maximum functional capacity in performing daily activities, taking into account both the functional capacity of the Member and those functional capacities that are appropriate for members of the same age.

DESCRIPTION:
Uterine fibroids (leiomyomata) are benign tumors commonly found during the reproductive years. Magnetic Resonance Focused Ultrasound therapy is a non-invasive treatment that proposes to treat symptomatic fibroids by applying a precise ultrasound beam to the tumor causing tissue destruction by thermal injury, while preserving adjacent structures. This procedure can be done as an outpatient in an MRI suite with no anesthesia or conscious sedation. One system, Exblate 2000® has received marketing approval from the Food and Drug Administration.

EXCLUSIONS: The Plan does NOT provide coverage for MR Ultrasound of Uterine Ablations because it is considered experimental, investigational or unproven. Although the device is FDA approved, there is insufficient evidence in the peer-reviewed published medical literature to establish the effectiveness of this treatment on health outcomes when compared to established treatments or technologies.

Note: A complete description of the process by which a given technology or service is evaluated and determined to be experimental, investigational or unproven services is outlined in MP 15 - Experimental Investigational or Unproven Services or Treatment.

CODING ASSOCIATED WITH: MR Ultrasound of Uterine Ablations
The following codes are included below for informational purposes and may not be all inclusive. Inclusion of a procedure or device code(s) does not constitute or imply coverage nor does it imply or guarantee provider reimbursement. Coverage is determined by the member specific benefit plan document and any applicable laws regarding coverage of specific services. Please note that per Medicare coverage rules, only specific CPT/HCPCS Codes may be covered for the Medicare Business Segment. Please consult the CMS website at www.cms.gov or the local Medicare Administrative Carrier (MAC) for more information on Medicare coverage and coding requirements.

0071T Focused ultrasound ablation of uterine leiomyomata, including MR guidance; total leiomyomata, including MR guidance; total leiomyomata volume less than 200 cc of tissue.

0072T Focused ultrasound ablation of uterine leiomyomata, including MR guidance; total leiomyomata, including MR guidance; total leiomyomata volume greater or equal to 200 cc of tissue.

77022 Magnetic Resonance guidance for, and monitoring of, parenchymal tissue ablation
C9734 focused ultrasound ablation/therapeutic intervention, other than uterine leiomyomata, with magnetic resonance (mr) guidance
