Policy: MP185  
Section: Medical Benefit Policy  
Subject: Chemosensitivity and Chemoresistance Assays

I. Policy: Chemosensitivity and Chemoresistance Assays

II. Purpose/Objective:  
To provide a policy of coverage regarding Chemosensitivity and Chemoresistance Assays

III. Responsibility:  
A. Medical Directors  
B. Medical Management

IV. Required Definitions

1. Attachment – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. Exhibit – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. Devised – the date the policy was implemented.
4. Revised – the date of every revision to the policy, including typographical and grammatical changes.
5. Reviewed – the date documenting the annual review if the policy has no revisions necessary.

V. Additional Definitions

Medical Necessity or Medically Necessary means Covered Services rendered by a Health Care Provider that the Plan determines are:

- appropriate for the symptoms and diagnosis or treatment of the Member’s condition, illness, disease or injury;
- provided for the diagnosis, and the direct care and treatment of the Member’s condition, illness disease or injury;
- in accordance with current standards of good medical treatment practiced by the general medical community.
- not primarily for the convenience of the Member, or the Member’s Health Care Provider; and
- the most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member’s condition, and the Member cannot receive safe or adequate care as an outpatient.

Medicaid Business Segment

Medical Necessity shall mean a service or benefit that is compensable under the Medical Assistance Program and if it meets any one of the following standards:

(i) The service or benefit will, or is reasonably expected to, prevent the onset of an illness, condition or disability.
(ii) The service or benefit will, or is reasonably expected to, reduce or ameliorate the physical, mental or development effects of an illness, condition, injury or disability.
(iii) The service or benefit will assist the Member to achieve or maintain maximum functional
capacity in performing daily activities, taking into account both the functional capacity of the Member and those functional capacities that are appropriate for members of the same age.

**DESCRIPTION:** A chemosensitivity assay refers to any in vitro laboratory analysis that is performed especially to determine whether tumor growth is inhibited by a known chemotherapeutic agent or a panel of drugs. Conversely, chemoresistance assays are used to determine specific chemotherapeutic agents to which a patient’s tumor will not adequately respond. The use of in vitro chemotherapy sensitivity and resistance assays is thought to aid the physician in choosing the most appropriate and successful treatment for their patients.

**EXCLUSIONS:** The Plan does **NOT** provide coverage for Chemosensitivity and Chemoresistance Assays (including, but not limited to, the ChemoFx® assay) for any indication because it is considered experimental, investigational and unproven. The Geisinger Technology Assessment Committee evaluated this technology and concluded that there is insufficient evidence in the peer-reviewed published medical literature to establish the effectiveness of this test on health outcomes when compared to established tests or technologies.

**Note:** A complete description of the process by which a given technology or service is evaluated and determined to be experimental, investigational or unproven is outlined in **MP 15 - Experimental Investigational or Unproven Services or Treatment.**

**CODING ASSOCIATED WITH:**
*The following codes are included below for informational purposes and may not be all inclusive. Inclusion of a procedure or device code(s) does not constitute or imply coverage nor does it imply or guarantee provider reimbursement. Coverage is determined by the member specific benefit plan document and any applicable laws regarding coverage of specific services.*

- 81535 Oncology (gynecologic), live tumor cell culture and chemotherapeutic response by DAPI stain and morphology, predictive algorithm reported as a drug response score; first single drug or drug combination
- 81536 ChemoFX

**LINE OF BUSINESS:**
Eligibility and contract specific benefit limitations and/or exclusions will apply. Coverage statements found in the line of business specific benefit document will supersede this policy. For PA Medicaid Business segment, this policy applies as written

**REFERENCES:**

This policy will be revised as necessary and reviewed no less than annually.
