I. Policy: High Dose Rate (HDR) Temporary Brachytherapy for Treatment of Prostate Cancer

II. Purpose/Objective:
To provide a policy of coverage regarding High Dose Rate (HDR) Temporary Brachytherapy for Treatment of Prostate Cancer

III. Responsibility:
A. Medical Directors
B. Medical Management

IV. Required Definitions

1. Attachment – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. Exhibit – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. Devised – the date the policy was implemented.
4. Revised – the date of every revision to the policy, including typographical and grammatical changes.
5. Reviewed – the date documenting the annual review if the policy has no revisions necessary.

V. Additional Definitions
Medical Necessity or Medically Necessary means Covered Services rendered by a Health Care Provider that the Plan determines are:

a. appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
b. provided for the diagnosis, and the direct care and treatment of the Member's condition, illness disease or injury;
c. in accordance with current standards of good medical treatment practiced by the general medical community.
d. not primarily for the convenience of the Member, or the Member's Health Care Provider; and
e. the most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

Medicaid Business Segment
Medical Necessity shall mean a service or benefit that is compensable under the Medical Assistance Program and if it meets any one of the following standards:

(i) The service or benefit will, or is reasonably expected to, prevent the onset of an illness, condition or disability.
(ii) The service or benefit will, or is reasonably expected to, reduce or ameliorate the physical, mental or development effects of an illness, condition, injury or disability.
(iii) The service or benefit will assist the Member to achieve or maintain maximum functional
capacity in performing daily activities, taking into account both the functional capacity of the Member and those functional capacities that are appropriate for members of the same age.

DESCRIPTION:
Temporary brachytherapy with iridium-192, also known as high dose rate (HDR) brachytherapy differs from conventional Iodine-125 or Palladium-103 brachytherapy by using high intensity radioactive seeds implanted temporarily as opposed to lower intensity seeds planted permanently.

INDICATIONS:
Permanent radioactive seed implantation for prostate cancer with or without external beam radiation therapy (EBRT) is considered medically necessary.

HDR brachytherapy when used in combination with EBRT for locally advanced prostate cancer (stage T2b – T3c, Gleason score 7-10, PSA level greater than 10 ng/ml) is considered medically necessary.

EXCLUSIONS:
The Plan does NOT provide coverage for HDR temporary brachytherapy as a treatment of prostate cancer when used as salvage therapy because it is considered experimental, investigational or unproven.

Note: A complete description of the process by which a given technology or service is evaluated and determined to be experimental, investigational or unproven is outlined in MP 15 - Experimental Investigational or Unproven Services or Treatment.

CODING ASSOCIATED WITH: HDR Temporary Brachytherapy
The following codes are included below for informational purposes and may not be all inclusive. Inclusion of a procedure or device code(s) does not constitute or imply coverage nor does it imply or guarantee provider reimbursement. Coverage is determined by the member specific benefit plan document and any applicable laws regarding coverage of specific services. Please note that per Medicare coverage rules, only specific CPT/HCPCS Codes may be covered for the Medicare Business Segment. Please consult the CMS website at www.cms.gov or the local Medicare Administrative Carrier (MAC) for more information on Medicare coverage and coding requirements.

77799 Unlisted procedure, clinical brachytherapy
55875 Transperineal placement of needles or catheters into prostate for interstitial radionuclide application, with or without cystoscopy
55876 Placement of interstitial device(s) for radiation therapy guidance (eg, fiducial markers, dosimeter), percutaneous, prostate (via needle, any approach), single or multiple
55860 Exposure of prostate, any approach, for insertion of radioactive substance
76873 Ultrasound, transrectal; prostate volume study for brachytherapy treatment planning (separate procedure)
77316 Brachytherapy isodose plan; simple (calculation(s) made from 1 to 4 sources, or remote afterloading brachytherapy, 1 channel), includes basic dosimetry calculation(s)
77317 Brachytherapy isodose plan; intermediate (calculation[s] made from 5 to 10 sources, or remote afterloading brachytherapy, 2-12 channels), includes basic dosimetry calculation(s)
77318 Brachytherapy isodose plan; complex (calculation[s] made from over 10 sources, or remote afterloading brachytherapy, over 12 channels), includes basic dosimetry calculation(s)
77761 Intracavity radionuclide application; simple
77762 Intracavity radionuclide application; intermediate
77763 Intracavity radionuclide application; complex
77770 Remote afterloading high dose rate radionuclide interstitial or intracavitary brachytherapy, includes basic dosimetry, when performed; 1 channel
77771 2-12 channels
77772 Over 12 channels
77778 Interstitial radionuclide source application, complex, includes supervision, handling, loading of radionuclide source, when performed
77790 Supervision, handling, loading of radionuclide source
A9527 Iodine I-125 sodium iodide
C2635: Brachytherapy source, high activity, non-stranded, palladium 103, greater than 2.2 mCi (NIST), per source
C2636: Brachytherapy source, high activity, non-stranded, palladium 103, per 1 mm
C2638 Brachytherapy source, stranded, iodine-125, per source
C2639 Brachytherapy source, non-stranded, iodine-125, per source
C1716 Brachytherapy source, nonstranded, gold 198, per source
C1717: Brachytherapy source, high dose rate iridium 192, per source
C1719  brachytherapy source, nonstranded, non-high dose rate iridium 192, per source
C1728  Catheter, Brachytherapy seed administration
C2637  brachytherapy source, nonstranded, ytterbium-169, per source
C2638  brachytherapy source, stranded, iodine 125, per source
C2639  Brachytherapy source, nonstranded, iodine-125, per source
C2640  brachytherapy source, stranded, palladium 103, per source
C2641  brachytherapy source, nonstranded, palladium 103, per source
C2642  Brachytherapy source, stranded, cesium-131, per source
C2643  Brachytherapy source, nonstranded, cesium-131, per source
C2645  brachytherapy planar source, palladium-103, per square millimeter
0395T  High dose rate electronic brachytherapy, interstitial or intracavitary treatment, per fraction, includes basic dosimetry, when performed

LINE OF BUSINESS:
Eligibility and contract specific benefits, limitations and/or exclusions will apply. Coverage statements found in the line of business specific benefit document will supersede this policy. For Medicare, applicable LCD’s and NCD’s will supersede this policy. For PA Medicaid Business segment, this policy applies as written.
