V. Additional Definitions

Medical Necessity or Medically Necessary means Covered Services rendered by a Health Care Provider that the Plan determines are:

- a. appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
- b. provided for the diagnosis, and the direct care and treatment of the Member's condition, illness disease or injury;
- c. in accordance with current standards of good medical treatment practiced by the general medical community.
- d. not primarily for the convenience of the Member, or the Member's Health Care Provider; and
- e. the most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

Medicaid Business Segment

Medically Necessary — A service, item, procedure, or level of care that is necessary for the proper treatment or management of an illness, injury, or disability is one that:

- Will, or is reasonably expected to, prevent the onset of an illness, condition, injury or disability.
- Will, or is reasonably expected to, reduce or ameliorate the physical, mental or developmental effects of an illness, condition, injury or disability.
- Will assist the Member to achieve or maintain maximum functional capacity in performing daily activities, taking into account both the functional capacity of the Member and those functional capacities that are appropriate for Members of the same age

CRITERIA: REQUIRES PRIOR AUTHORIZATION BY A PLAN MEDICAL DIRECTOR OR DESIGNEE

To be considered for admission to an inpatient rehabilitation facility, **ALL MUST BE MET:**

- The member has had a recent acute event resulting in a significant function decline requiring an interdisciplinary team approach that includes:
 - Weekly rehabilitation team assessment, intervention, and conferences due to the potential risk of significant change in physical or medical status; and
 - 24-hour per day access to a rehabilitative registered nurse; and
 - Supervision or active intervention by a rehabilitation physician at least 3 times per week; and
 - The planned rehabilitation services require an intensity, frequency and duration as to make it impractical for the services to be delivered in a less intense setting
- The member must be clinically stable enough to follow commands, and be able to tolerate and willing to participate in an intensive therapy program for a minimum of 3 hours/day, 5 days/week
- The member must require at least 2 therapy disciplines (PT, OT, ST, orthotics/prosthetics), one of which must be PT or OT
- The rehabilitative program is individualized and defines quantifiable outcome goals; and
- There is a reasonable expectation of significant therapeutic improvement as a result of the rehabilitative program over a clearly defined timeframe, and reasonable expectation of discharge to home or other community setting

EXCLUSIONS:

Inpatient rehabilitation will be considered to be not medically necessary and therefore **NOT COVERED** when any of the following apply:

- The medical record documentation does not support the need for intensive inpatient rehabilitation
- The member's condition is such that the medically necessary services could be adequately provided in a less intensive setting
- A program of coordinated interdisciplinary care is either not required or not provided
- A significant meaningful therapeutic improvement is not expected
- The treatment is intended to maintain the current physical state, or to prevent or slow progressive deterioration of the current state.

Medicaid Business Segment:

Any requests for services, that do not meet criteria set in the PARP, may be evaluated on a case by case basis.

Note: A complete description of the process by which a given technology or service is evaluated and determined to be experimental, investigational or unproven is outlined in MP 15 - Experimental Investigational or Unproven Services or Treatment.
