22. Cardiology Clinic

Our system:
Founded in 1915, Geisinger is a physician-led health care system, dedicated to health care, education, and research. The system serves more than 2.6 million residents throughout 44 counties in central and northeastern Pennsylvania.

Our purpose:
Everything we do is about caring — for our patients, our members, our Geisinger family of physicians and employees, and our communities.

For convenience:
We do not schedule specific times for your lab services. We know it is hard to choose an exact time to arrive for lab work. You can come in when it is convenient for you, but as a result, you may come in at a time when many others are also present for lab work. We will process your request and have you on your way as quickly as possible.

When will results be finished?
Most testing is done right at the hospital. Cultures may take several days to complete. The majority of tests will be completed the same day and a report will be to your physician by the following morning. That way, the physician can contact you with any immediate concerns. Patients can also join MyGeisinger.org to track their lab results.

What can I do to make the lab visit easier?
Bring your lab orders, if provided by your physician, and be sure to follow any necessary guidelines prior to lab work, such as fasting.

Thank you for choosing Geisinger Lewistown Hospital. We are always striving to make your visits better. If you have any concerns or suggestions for improvement please contact the lab manager, Willie Hinkle, at 717-242-7474.
