

## Identifying Individual-to-Individual Abuse (I2I Abuse)

Consider the PERSPECTIVE of the VICTIM

→ If an individual *perceives* that a situation of abuse has occurred, file an I2I Abuse report in HCSIS under their name

Consider the INTENT of the TARGET → If a target *intended* to do harm, even if no harm actually occurred, file an I2I Abuse report in HCSIS under the victim's name

If there was **NO PERCEPTION** of harm **AND NO INTENTION** to do harm (ex: truly an “accidental” collision between two individuals), no I2I Abuse incident needs to be filed in HCSIS
