

# Orthopaedic Urgent Care

## Expanding services to protect healthy patients from COVID-19

If you have a patient with an injury such as a minor strain, sprain or simple fracture, send them to one of our six Orthopaedic Urgent Care locations. Healthy patients need to be separated from those with symptoms of COVID-19, and we are here to help.

### We see injuries related to:

- Minor strains
- Sprains
- Simple fractures

### We can:

- Evaluate and treat injuries
- Perform X-rays
- Create splints and casts
- Administer pre-approved injections
- Schedule follow-up appointments
- Provide documentation for workers' compensation

We cannot treat severe fractures or dislocations. These conditions need to be sent to the Emergency Department for after-hours care or an appointment could be scheduled.

We cannot perform advanced imaging at our locations, and we cannot order or provide pain medication.

### Additional information:

- We see injuries that occurred in the last 72 hours and do not require Emergency Department treatment.
- Our visits are charged as specialty visits – not urgent care.
- Orthopaedic Urgent Care is first come, first served. There may be a wait to be seen.
- The patient may not see a physician but will be seen by a physician assistant, and then follow-up care can be scheduled as needed.
- This is not a substitute for a 3-day or 10-day referral for a condition that can wait. If the patient has been seen and can wait for a 3- or 10-day referral, put the referral in and we will be in touch with the patient for an appointment.

### Six locations:

#### Geisinger Woodbine

16 Woodbine Lane, Danville

Clinic: 570-271-7430
