## **DESCRIPTION:**

Sylvant (siltuximab) is a chimeric monoclonal antibody which binds with high affinity and specificity to IL-6, which then prevents IL-6 from binding to both soluble and membrane-bound IL-6 receptors. Overproduction of IL-6 may lead to systemic manifestations in multicentric Castleman disease (MCD) patients by inducing C-reactive protein (CRP) synthesis (Kurzrock 2013). Lowering serum IL-6 levels may improve systemic symptoms of Castleman disease.
